## CLASS DESCRIPTIONS - EARN UP TO 8 HOURS OF CONTINUING EDUCATION CREDITS

### Core Class

Minnesota State College Southeast Cosmetology instructor Jodi Heim will cover safety and sanitation, health infection control, and laws and rules of the industry in this four hour course. This course provides the attendee with up-to-date information in regards to current Minnesota statutes 155A and Minnesota Administrative Rules.

LOCK & LOADED

### Lock and Loaded Men's Fusion Cutting ★

Men's Fusion Cutting: Join Award winning platform artist Matt Belding as he bridges the gap between male hairdressing & barbering with our "FUSION" cutting system. This systematic approach provides stylist and barbers with a road map to creating the most efficient and consistent men's haircuts. Matt will give you a look at the evolution of men's grooming: Two art forms that have lived in different worlds for too long, male hairdressing and barbering will be fused together to allow stylists to cater to all men's grooming needs.

### Express Eyelash Extension Certificate

This 4-hour eyelash extension continuing education course will cover everything you need to know to start your adventure with eyelash extensions. From safety and sanitation, to laws and rules. From product knowledge, to application best practices, to hands-on in-class training. Join us for an afternoon of training in one of the newest certifications MSC Southeast Cosmetology Academy has to offer. Taught by instructor Julia Stuckmayer.

### Nail Design

This course will bring you up to date with current product chemistry as well as techniques. You will enjoy a hands on nail enhancement experience that will allow you to trouble shoot and build your skills while connecting with other industry professionals. Taught by Toni Periattt, education ambassador with CND.

★ FOR LICENSED COSMETOLOGISTS ONLY

### Colourist Series Melt ★

Following in the footsteps of ombré and balayage is color melting, an even more subtle approach to highlighting your hair. Roger McCauley, regional manager with Aloxxi, will demonstrate how color melting works on a variety of shades, from rich brunettes, baby blonds, and dimensional reds to rainbow hues. Different from balayage and ombré, color melting cascades flawlessly down the hair shaft from roots to ends, creating the perfect range of color without any signs of demarcation. Technically a form of highlighting, the shades are placed in order to blend together instead of pop.
