Electronics Certificate

Earning college credits in electronics will give you several options upon graduation.

Go right to work.
As an entry-level electronics operator you can earn \$14-\$16/hour — plus your employer may pay for diploma or degree completion.

Go to MSC Southeast. Earn a diploma or AAS in Electronics, Mechatronics, Biomedical, Electrical or Computer Engineering. You'll be ready to enter the workforce or transfer to a 4-year university.

Go to a 4-year university.
With your hands-on experience in electronics, you will be well prepared to begin a 4-year degree program in engineering.
